

**[DRAFT] Data Sheet E – Results of Internal Review Committee**

Date of Review/Recommendation: November 23, 2010

Water Body Under Evaluation:

Water Body ID #: 2585  
Name: Myatt Creek (Class C)  
Length of Segment: 12.0 miles  
County (ies): Howell

Use Attainability Analysis (UAA) Study:

UAA ID #: 1286  
Submitter: Olsson Associates  
Date(s) Conducted: August 7, 2008  
Date Received: October 14, 2008  
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: The UAA survey was conducted in September 2008 and there were no WBCR observed. There was a fire pit, ATV tracks, foot paths and prints located at the survey locations signifying SCR use. There were no interviews conducted during the 2008 UAA.

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The stream met the maximum depth for WBCR at 2 of 7 sites and median depth criteria at one site. There was also a pool >1 m located near site #7. No interviews were conducted in 2008 and a previous UAA had similar results. Since the depth criteria was met and there was evidence of use, the committee recommends WBCR be retained and SCR be added.

**Committee Recommendation:**

☐ Add Use ☒ Retain Use ☐ Remove Use  
☐ Modify Use ☐ Inconclusive
